# Our Custom Coral

## Realism Matters!

All of our corals are meticulously molded from actual coral skeletons and cast using a specialized aquarium-safe urethane rubber. This special urethane offers incredibly high tear-strength as well as impact-, wear- and UV-resistance. Unlike other imitation corals, our corals are not painted, but rather are infused throughout with color so our products will not fade or deteriorate. Our corals are safe for freshwater and saltwater. They are used in public & private collections all over the US.

553 Large Favites

165 Large Tabletop Acropora

717 Large Tall Cat's Paw

108 Medium Cluster Acropora

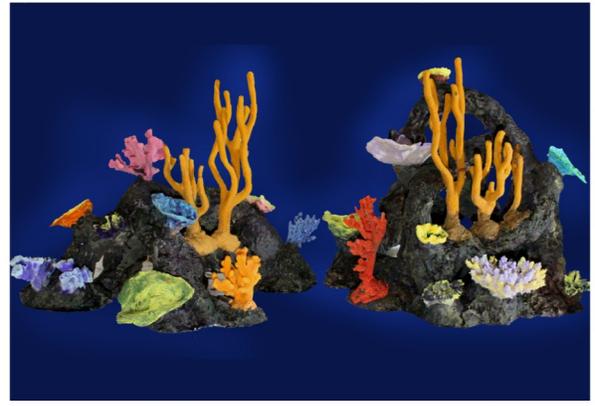

305 Small Lobophyllia

# Our Custom Inserts

**Realism Matters!**

We take the same level of pride in our coral reef inserts, overflow covers and specialty tank décor as we do in our individual coral pieces. Using only animal friendly materials, we help bring your vision to life. Realistic or Fantasy - we work for you.

Reach out to us to get a quote for your ideal insert!
